

# Roads Infrastructure – Road Hierarchy

– A new Local Distributor Road Network (LDRN) will be provided for the site. The LDRN will consist of new roads for the development i.e. High Street, The Avenue, The Boulevard, and the new realigned Whitehouse Road and Coshquin Road.

– The Whitehouse Road and Coshquin Road, indicated in green below, will form the main part of the LDRN, with the existing Whitehouse Road and Coshquin Road to be realigned. The Whitehouse Road and Coshquin Road will form the main ‘spine’ LDRN, which will connect to the Skeoge roundabout via a new roundabout on the Whitehouse Road/Coshquin Road.

– As indicated in magenta, the new internal road network for the site will consist of The Avenue, The Boulevard and the High Street, which are considered to be ‘secondary’ roads linking the LDRN through the development.

– As part of the ‘A2 Buncrana Road Widening Scheme’, DFI Roads will deliver an additional roundabout on the Buncrana Road, adjacent to the Elagh Business Park, and road infrastructure upgrades as indicated in blue below. These future works will therefore allow ‘The Cashel’ to be accessed via two roundabouts from the A2 Buncrana Road.
